 Participating Clubs

We gratefully acknowledge the support of all of the Modelling Clubs who attend Model Expo with a Club Display as well as those that assist in the organisation and running of the event. We also welcome any Modelling Clubs who wish to display or assist in future Model Expo’s and encourage you to contact us at www.modelexpo.com.au.

</table>
The initial idea for a model expo came about as early as 1979, when IPMS Australia member Bill Hamer and a handful of IPMS cohorts discussed the possibility of running an ‘open’ competition, based on the IPMS-USA experience. In those days the IPMS Annual Competition was held in the Melbourne University’s Union House building (1979), and in the University’s Janet Clarke Hall (1980/81). These venues were suitable for adding an ‘open competition’ element to the IPMS Nationals, but it wasn’t until 1981 that this actually came about. It was similar to the IPMS-USA event and was a prelude to what would eventually become, ‘The Australian Model Expo’.

In 1982 Bill Hamer organised the first semblance of a Model Expo. It was called the IPMS Annual Convention and Open Model Competition and was held in the Centrepoint Building at the Royal Melbourne Showgrounds. For the first time ever the event included both traders’ and importers’ display stands, and also allowed members of the public to enter in their own special competition categories. It wasn’t just another competition; as both club members and the public could see new kit releases and talk to traders involved in the hobby. It was held over two days and thus started the era of a weekend competition, which was highly praised.

In 1983 IPMS Australia member, Bill Wallis, organised another convention and renamed it ‘Model Expo’, which was held in the B.P. Ronald Pavilion at the Melbourne Showgrounds. For various reasons, Model Expo did not go ahead in 1984. However in 1985 ‘Model Expo’ returned, but this time under the auspices of Bill Wallis and the President of IPMS Australia, Frank Morgan, with the event being held in the Arts and Crafts Pavilion at the Melbourne Showgrounds. The event proved to be a huge success and Model Expo was now more than just a case of preaching to the converted; it was also a case of ‘converting the uninitiated’ to the wonderful world of scale modelling.

In those days the hobby received great support from both the traders and importers of model kits and accessories, who recognised the importance of maintaining Model Expo’s impetus. Other Victorian modelling clubs also began to assist in the planning and organisation and promoted their clubs by putting on displays. Frank Morgan took over the reigns from Bill Wallis in 1989 and continued to be an innovative force behind Model Expo until 2001, when Laurence Farrugia became the Model Expo Director. In 2008 the reigns were passed onto Rene de Koning who is the current Model Expo director.

After 1985, subsequent Model Expos continued in the Arts and Crafts Pavilion at the Showgrounds until 2002, when the building was eventually destroyed by fire. It then moved to the RAS No.1 Exhibition Centre within the Showgrounds where it was held for another two years. In 2005 it then moved to the Sandown Entertainment Centre at Sandown Racecourse in Springvale, where it is still held each year.

Each successive Model Expo Director, including the organising committee, have introduced a number of changes to the event over the years, which has ensured that ‘The Australian Model Expo’ is always well organised and remains relevant. A testament to the success of ‘The Australian Model Expo’ is the number of similar modelling events, which are now held across Australia.

It takes a full twelve months of planning to organise each year’s Model Expo. The Model Expo committee is made up of volunteers from a number of local modelling clubs who are dedicated to continuing the tradition of the event, which is to provide the public and enthusiasts with an annual scale modelling show and competition. Regular committee meetings are held to ensure that all stages of the planning are running on track and that any problems that arise are dealt with well before the event. Each year a countless number of tasks have to be dealt, with the single greatest problem being the continual lack of manpower, which is required to help with the setting up, breaking down, booking in, scrutineering, judging and myriad of other matters.

Model Expo has attracted large crowds over the years and provided a showcase of modelling for the viewing public’s pleasure, plus the much anticipated model kit Swap & Sell, which is held on the Monday.

2008 was the modern Model Expo’s 25th anniversary, which was only made possible by the efforts of both past and present Model Expo committees who have ensured that the hobby of scale modelling has remained in the public eye, for such a long time. The ‘Australian Model Expo’ continues to be Australia’s greatest ambassador for the hobby of scale plastic modelling and as such we look forward to celebrating its 30th anniversary in 2013.
Scale plastic modelling

Plastic models, often called scale models, are models manufactured as kits which are assembled by hobbyists, and intended for static display. The most popular subjects of plastic models are by far Aircraft, Ships, Automobiles, and Armoured Vehicles such as tanks. The majority of models depict military items, due to the wider variety of form and historical context compared to civilian vehicles. Other subjects include Science Fiction and Fantasy vehicles and robots, Spacecraft, Dioramas, Animals and Human Figures. Most plastic models are injection-moulded in polystyrene, and the parts are glued together with plastic solvent. While sometimes omitted by novice modellers, specially formulated paint is applied to assembled models. Complex markings such as aircraft insignia are typically provided with kits as slide-on decals. A recent trend (for novices) has been to offer kits where the parts snap together, with no glue needed, and with a paint scheme pre-applied to some or all of the parts. Plastic ship model kits typically provide waxed thread in several sizes and colours for the rigging.

Almost all plastic models are designed in a well-established scale. Each type of subject has one or more common scales, though they differ from one to the other. The general aim is to allow the finished model to be of a reasonable size, while maintaining consistency, which enables models to be displayed as part of a collection. The first plastic model kits - made of cellulose acetate - were manufactured in 1936 by Frog and marketed under their Penguin range. Whereas the first modern day plastic model kits - made of polystyrene - were manufactured in the 1950s in Britain by Frog, Kitmaster and Airfix, in the USA by Revell, AMT, Lindberg, Aurora, and Monogram and in France by Heller SA. Since the 1970s, the Japanese firms of Hasegawa and Tamiya, and the Chinese firms of DML, AFV Club and Trumpeter have dominated the modelling scene and represent the highest level of technology. Brands from Russia, Central Europe, China, and Korea have also become prominent in more recent times.

While injection-moulding is the predominant manufacturing process for plastic models, the high costs of equipment and making moulds make it unsuitable for lower-yield production. Thus, models of minor and obscure subjects are often manufactured using alternative processes. Vacuum forming is popular for aircraft models, though assembly is more difficult than for injection-moulded kits. Resin-casting, popular with smaller manufacturers, particularly 'Aftermarket' firms (but also producers of full kits) yields a greater degree of detail moulded in situ, but as the moulds used do not last as long, the price of such kits is considerably higher. In recent times, the latest releases from major manufacturers offer unprecedented detail that is a match for the finest resin kits, often including high-quality mixed-media (photo-etched brass, turned aluminium) parts. Many modellers build dioramas as landscaped scenes built around one or more models. They are most common for military vehicles such as tanks, but airfield scenes and 2-3 ships in formation are also just as popular.

Conversions use a kit as a starting point, and modify it to be something different. For instance, a 1949 Mercury coupe can be converted to a customised version by altering the body shape and configuration using chopping and channelling techniques, and body putty.

Scratchbuilding is the creation of a model ‘from scratch’ rather than a manufactured kit. True scratchbuilt models consist of parts made by hand and do not incorporate parts from other kits. These are rare. When parts from other kits are included, the art is technically called ‘Kit Bashing’. Most pieces referred to as scratchbuilt are actually a combination of kit bashing and scratchbuilding. Kit bashing is a modelling technique where parts from multiple model kits are combined to create a novel model form.

The demographics of plastic modelling have changed in its half-century of existence, from young boys buying them as toys to adults building them to assemble large collections. Technological advances have made model-building more sophisticated, and the proliferation of expensive detailing add-ons have raised the bar for competition within the modelling clubs. As a result, a kit built ‘Out of Box’ on a weekend can rarely compare with a kit built over months where a tiny add-on part such as an aircraft seat can cost more than the entire kit itself. However it is still possible for an Out of Box model to be a significant force in a competition because of the higher degree of attention paid to the construction and finishing techniques.

In today’s high-tech hustle and bustle world, plastic modelling provides a welcome relief from pent-up stresses and brings back the use of manual skills and eye/hand co-ordination to produce magnificent and rewarding scale replicas of subjects to be long admired and appreciated. The hobby also provides an educational avenue as building to reference materials invariably leads to more learning and knowledge.
A quick guide to judging

For Judges:

“Judge the work of others in exactly the same way, as you would want others to judge your work”.

1. All judging is impartial. In the Competition Room, judges have no friends or enemies. Knowledge of who built a particular model must not influence the outcome of the judging.

2. A judge will never judge his own work, nor will he attempt to influence other judges who are evaluating his work.

3. All judging is done using the same set of rules and applying the same criteria to every model in the room.

4. From the time that judging begins, and until the final results are made available on the tables, judges should avoid disclosing the outcome of any portion of the contest to anyone who did not participate in the judging.

5. During the judging process, judges will point out and discuss a model's pros and cons, but should do so in a way that is not disparaging to the model or its builder.

6. Judges shall perform their duties diligently and with integrity at all times.

7. Judges must keep in mind they are judging the modeller's skills and not the model provided.

8. Judges must adhere to the reference material provided by the modeller, and not use their own knowledge to determine points allocation. The Chief Judge will be consulted if there is any doubt in the integrity of the reference material provided.

9. The Chief Judge has the power to exclude or remove from the competition, any entry which is deemed by a Model Expo official to be either inappropriate or offensive to generally acknowledged standards of taste and acceptability.

For Competitors:

“God, grant me the serenity to accept the things I cannot change; the courage to change the things I can; and the wisdom to know the difference”.

1. While judging is in progress you must not distract or disturb the judges in any way. You must not talk to them nor ask about your model. Judging requires a high degree of concentration and any distraction may result in lost points through an important item being missed.

2. Throughout the judging process the main criteria will concentrate on the basics of good modelling such as construction, attention to detail, finish, accuracy to reference and realism. Judges will look for obvious flaws first, such as open seams or gaps, misaligned parts, glue marks, or poorly applied paint. Only when these basics are exhausted and a winner is still undetermined will they look deeper for any flaws in the modeller's work.

3. Beyond the basics, another important consideration is consistency. A model should exhibit the same standard of building throughout. For example an aircraft model in which the builder has super-detailed the cockpit but not the wheel wells would lack a consistent level of detail. This is also true for finishing. The paint scheme should be consistent with the references, as should any weathering that has been applied.

4. Where required you must supply reference material for each of your models. It is better to present photocopies of pages from the relevant reference books and magazines rather than bringing them all in.

This is done in order to protect your precious books or magazines and to ease the judges time and efforts when checking the references. The model kit instruction sheet is an accepted from of reference, as is the kit box top. The judges will look for evidence to back up your models colour scheme and/or modifications to the original configuration. We also encourage models to be presented on a base as this allows the judges to handle your models more easily. Refer to the section ‘Hints & tips for entrants’.

5. The judge's decision is final and no disputes will be entertained by either the Chief Judge and/or any of the Model Expo officials.
Hints & tips for entrants

1. You can either print or download the Competition Entry Form from the Model Expo website (www.modelexpo.com.au) and this should be filled in, either electronically or manually, prior to entering the competition. Having your entry form filled in before attending the Model Expo, will save you time at the registration desk.

2. Consider putting your model on a base. This will ease handling and minimise the chances of any damage to your model, especially during the judging process.

3. Remember to bring along your reference material, even if it is only the kit box top (for a figure) or the kit instructions.

4. Make a cover sheet for your reference material and include a brief description of what you have done to your model.

5. Keep your reference material to a minimum and ensure that it is relevant to the model being presented. Only present as much information as is needed.

6. **Photocopy or scan your reference material and leave your precious reference books and magazines at home.**

7. Read the 'Classes and Categories', as well as the 'Conditions of Entry', so that know which categories your models are to be entered in before you get to the registration desk.

8. Remember to pick up your model and reference material at the end of the awards, as every year a number of models and a mountain of reference material is left behind. It is **not** the responsibility of Model Expo to care for these or to return them and they may be disposed of.

9. Be early at the booking-in desk so that you don’t have to stand in a long line.

10. Place a note with your model, either on the base or next to it, to inform the judges or Model Expo staff if it has any missing or broken parts or it is not attached to the base.

11. Remember, **the best dioramas tell a story.**
Model Expo judging explained

This section provides competitors with an overview of the judging guidelines, used by the Judges at Model Expo.

The Model Expo Judging System comprises of a two tiered Judging system. **Stage 1** of the system looks for the obvious faults in your model and scores the model out of 12 points. The general rule is that models that score 9 or higher will go onto the second stage of judging. All models making the second stage of judging will automatically be awarded a commended certificate as a minimum. **Stage 2** of the system is a more rigorous appraisal of your model and the judges mark the model according to a strict set of guidelines. This is a very in-depth look at the model, and is quite critical. At the second stage of judging the model is scored out of 100 points.

Judging generally takes place on the Saturday evening of the competition. Around 40+ judges participate in judging the models across all categories. 95% of the judges are experienced Model Expo judges and have participated in more than three Model Expos in the past. Any inexperienced judges are initially placed with an experienced judging team for observation purposes and then with a highly experienced judge for practical experience, sometime during the evening. In the second year that they judge they will then be paired with an experienced judge who has at least two years experience of judging at Model Expo’s. All judges are continually reminded to handle and treat a competitors model with respect. However anytime you handle a model accidents can happen. For this reason Model Expo prefers models to be placed on a base for ease of handling. The model does not have to be glued to the base.

Each stage of the judging process is detailed as follows:

**Stage 1:**

During the first stage of judging the model is marked on a scale of 1 to 3 (with 3 being the best score) in the following areas:

- **Construction**
- **Attention to detail (effort)**
- **Finish**
- **Reference**

A copy of the Stage-1 judging score sheet is shown at **Figure 1**.

**What are the judges looking for?**

Basically the Judges are looking for the following:

- **Construction** – unfilled seams, ejector pin marks, glue marks, misaligned parts, gaps and ‘sprue-dags’.
  - 1 – Badly misaligned parts, obvious seams, glue marks
  - 2 – Work has been done to clean up the construction, less obvious seams etc. but still some defects easily visible.
  - 3 – No noticeable defects on looking at the model.

- **Attention to detail** (effort) – Extra care has been taken with kit detail, what extra effort has been taken with modified models.
  - 1 – No effort has been made for details or additions
  - 2 – Some effort has been taken with details or additions
  - 3 – A large amount of effort has been taken with details and or additions.

- **Finish** – Sanding marks, silvered decals, dust in the paint, orange peel paint, inconsistent paint finish, brush strokes, paint runs, overspray.
  - 1 – Many defects in the paint are visible.
  - 2 – A few defects are evident in the finish of the model.
  - 3 – No defects are readily visible in the finish.

- **Reference** – What references are there? Has the modeller gone to extra effort to provide references of the actual subject? Are the kit instructions provided?
  - 1 – No reference provided
  - 2 – Instructions only provided with the model
  - 3 – Extra references provided by the entrant which are relevant to the subject.

The scores are then correlated and the top scoring models move onto the second stage of judging. On average this around 5 to 6 models from each category.

**Stage 2:**

The judges are issued with a score sheet for each model that has passed the first stage of judging. A copy of the judging score sheet has been provided at **Figure 2** to show an example of how the model is judged. As can be seen from the sheet the review of the model is extensive and very detailed. The judges follow these strict guidelines when they assess the models, and points are allocated according to the word picture score presented to them on the score sheet. From this the scores are then correlated and the top 3 scoring models then ranked first, second and
Model Expo judging explained

third in order. In the case of a tie, the head judge and the judging team will confer and the tie will be broken after deliberation. On the day after the judging has occurred the head judge and a deputy will review all scores and all categories to ensure that all judging has been completed and to check the judges work. Any result anomalies that are found may mean that a category will need to be re-judged. After the review is completed all categories are signed off and the results are posted. Due to the large amount of categories and models at Model Expo this may mean the results are not posted until late on Sunday afternoon. If you are a competitor it is best not to expect to see the results posted on Sunday before 3pm.

Hopefully this has helped to answer some of the questions regarding how your models are judged at Model Expo.

**PLACING**
Model Expo Groups, Classifications and Categories explained

Competition Groups

Model Expo divides the competition entries into 3 main groups and these are as follows:

**Senior** – Entrant 18 years of age and over.

**Intermediate** – Entrant 14 years of age and over but under 18 years of age as at 1st June in the year of the competition.

**Junior** – Entrant under 14 years of age as at 1st June in the year of the competition.

Competition Classifications

Models are divided into 3 main classifications depending on the amount of work/modifications involved to complete them.

Model Expo scrutineers will help you to classify your model based on the amount of work/modifications done to finish the model and will then advise you on which category it should be entered into. If you are unsure of your models classification or category at the time of entry, then please seek the assistance of the scrutineers.

The competition classifications are as follows:

**Out of Box** – (OOB)

1. The model must be built using the parts contained within a single kit. Basic additions and alterations that are allowable are listed separately for each model type (ie Aircraft, AFV’s and Automotive Vehicles). Please read each particular category carefully for a full explanation.

2. The basic shape/make of the model may not be altered.

3. Kit parts may be refined, as long as the basic shape remains unchanged. Exhausts, gun barrels and air inlets may be opened up. Steering wheels may be turned at an angle. Tyres may be flattened at ground contact.

4. Filler, surfacing materials and scrap plastic may be used to rectify gaps and defects.

5. If the instruction sheet makes specific reference to an accessory part(s) marketed for the model by the kit manufacturer then that part(s) may be added.

6. The model may be finished in any colour scheme and markings.

**Modified** – (MOD)

Any model which has been extensively modified, and does not conform with the OOB rules, with the addition of aftermarket or scratch built parts. Any modifications which change the basic shape or mark of the model from the original kit.

**Open** – (OPEN)

This combines models from all classifications into one category. It is not bound by either the Out of Box or Modified rules.

Competition Categories

Models are divided into categories by type and these are as follows:

**Aircraft**

**Military Vehicles**

**Automotive Vehicles**

**Vignettes & Dioramas**

**Figures**

**Sci Fi, Movie & Fantasy**

**Ships**

**Miscellaneous & Scratchbuilt**

The model categories are also divided into scales, with some of the more common ones being 1/35 for Military Vehicles, 1/48 for Aircraft, 1/24 for Automotive Vehicles etc. Models of like scales will be placed together. Some categories are also divided by era or subject matter, such as Propeller Driven and Jet Propelled Aircraft.

Each model is assigned to a category. Each of these categories has a number and in some cases particular rules pertaining to them.

The following pages describe each category in detail.

Please read the following category descriptions carefully.
AIRCRAFT

The following categories include Military, Airliner, Rotary Wing and Non-Military aircraft models.

**ME11A1 - Large Scale Aircraft - Propeller Driven - Pre 1935**

Aircraft 1/35 scale and larger.

An OPEN category and not subject to Out of Box or Modified rules.

**ME11A2 - Large Scale Aircraft - Propeller Driven - Post 1935**

Aircraft 1/35 scale and larger.

An OPEN category and not subject to Out of Box or Modified rules.

**ME11B - Large Scale Aircraft - Jet or Rocket Propelled**

Aircraft 1/35 scale and larger.

An OPEN category and not subject to Out of Box or Modified rules.

**ME12A1 - Medium Scale Aircraft - Out of Box - Propeller Driven - Axis**

Aircraft between 1/36 and 1/71 scale.

The original kit may be enhanced in the following ways:
- Antennas or aerials.
- Seat belts.
- Rigging wires.
- Alternative wheels.
- Panel lines may be re-scribed after construction or to correct inaccuracies.
- Change of paint scheme and/or decals.
- Refining of kit parts without changing their basic shape.
- Drilling out of gun barrels and/or exhausts.

**ME12A2 - Medium Scale Aircraft - Out of Box - Propeller Driven - Allied**

Aircraft between 1/36 and 1/71 scale.

The original kit may be enhanced in the following ways:
- Antennas or aerials.
- Seat belts.
- Rigging wires.
- Alternative wheels.
- Panel lines may be re-scribed after construction or to correct inaccuracies.
- Change of paint scheme and/or decals.
- Refining of kit parts without changing their basic shape.
- Drilling out of gun barrels and/or exhausts.

**ME12B - Medium Scale Aircraft - Out of Box - Jet or Rocket Propelled**

Aircraft between 1/36 and 1/71 scale.

The original kit may be enhanced in the following ways:
- Antennas or aerials.
- Seat belts.
- Rigging wires.
- Alternative wheels.
- Panel lines may be re-scribed after construction or to correct inaccuracies.
- Change of paint scheme and/or decals.
- Refining of kit parts without changing their basic shape.
- Drilling out of gun barrels and/or exhausts.

**ME13A - Medium Scale Aircraft - Modified - Propeller Driven**

Aircraft between 1/36 and 1/71 scale.

Additions or modifications which have been added or alterations to the original kit, such as aftermarket additions or scratch built details (e.g., cockpit sets, engines, replacement wing etc). Any modifications which change the mark or version of the aircraft from the original kit representation. Colour schemes and decals may be changed.

**ME13B - Medium Scale Aircraft - Modified - Jet or Rocket Propelled**

Aircraft between 1/36 and 1/71 scale.

Additions or modifications which have been added or alterations to the original kit, such as aftermarket additions or scratch built details (e.g., cockpit sets, engines, replacement wing etc). Any modifications which change the mark or version of the aircraft from the original kit representation. Colour schemes and decals may be changed.

MILITARY VEHICLES

The following categories pertain to Military Vehicles and Equipment and Armoured Fighting Vehicles.

Definitions:

1. **Armoured Fighting Vehicles (AFVs)** – combat vehicles with armoured plate or coverings with crew served weapons 20mm and larger. This includes self propelled guns on modified soft-skins.

2. **Military Vehicle** – unarmoured or soft skinned vehicles in military service.

3. **Military Equipment** – artillery, flak weapons and large military equipment (eg: mobile radar installation or rocket launcher).

**ME21A1 - AFV Large - Out of Box - Axis**

Armoured fighting vehicles 1/35 scale and larger with markings for the Axis alliances.

The original kit may be enhanced in the following ways:
- Antennas or aerials.
- Seat belts.
- Change of paint scheme and/or decals.
- Refining of kit parts without changing their basic shape.
- Drilling out of gun barrels and/or exhausts.
- Panel lines maybe re-scribed after construction or to correct inaccuracies.
- Steering wheels maybe turned.
- Limited Stowage maybe applied up to five (5) objects.

**ME21A2 - AFV Large - Out of Box - Allied**

Armoured fighting vehicles 1/35 scale and larger with markings for the Allied alliances.

The original kit may be enhanced in the following ways:
- Antennas or aerials.
- Seat belts.
- Change of paint scheme and/or decals.
- Refining of kit parts without changing their basic shape.
- Drilling out of gun barrels and/or exhausts.
- Panel lines maybe re-scribed after construction or to correct inaccuracies.
- Steering wheels maybe turned.
- Limited Stowage maybe applied up to five (5) objects.

**ME22A - AFV Large - Modified - Pre 1950**

Armoured fighting vehicles 1/35 scale and larger.

Vehicles in this class must be dated by the references to pre 1950.

Additions or modification which have changed the original kit, such as aftermarket or scratch built additions (eg: etched brass or resin interior sets). Any modifications which change the mark or version of the vehicle from the original kit representation.

**ME22B - AFV Large - Modified - Post 1950**

Armoured fighting vehicles 1/35 scale and larger.

Vehicles in this class must be dated by the references to post 1950.

Additions or modification which have changed the original kit, such as aftermarket or scratch built additions (eg: etched brass or resin interior sets). Any modifications which change the mark or version of the vehicle from the original kit representation.

**ME23A - Military Vehicles & Equipment - Large - Out of Box**

Military vehicles and equipment 1/35 scale and larger.

The original kit may be enhanced in the following ways:
- Antennas or aerials.
- Seat belts.
- Change of paint scheme and/or decals.
- Refining of kit parts without changing their basic shape.
- Drilling out of gun barrels and/or exhausts.
- Panel lines maybe re-scribed after construction or to correct inaccuracies.
- Steering wheels maybe turned.
- Limited Stowage maybe applied up to five (5) objects.

**ME23B - Military Vehicles & Equipment - Large - Modified**

Military vehicles and equipment 1/35 scale and larger.

Additions or modification which have changed the original kit, such as aftermarket or scratch built additions (eg: etched brass or resin interior sets). Any modifications which change the mark or version of the vehicle from the original kit representation.
Model Expo Groups, Classifications and Categories explained

ME25 - AFV's, Military Vehicles and Equipment - Medium
Armoured fighting vehicles, military vehicles and equipment between 1/36 and 1/71 scale.
An OPEN category and not subject to Out of Box or Modified rules.

ME26A - AFV’s, Military Vehicles and Equipment - Small - Out of Box
Armoured fighting vehicles, military vehicles and equipment 1/72 scale and smaller.
The original kit may be enhanced in the following ways:
Antennas or aerials.
Seat belts.
Change of paint scheme and/or decals.
Refining of kit parts without changing their basic shape.
Drilling out of gun barrels and/or exhausts.
Panel lines maybe re-scribed after construction or to correct inaccuracies.
Steering wheels may be turned.
Limited Stowage maybe applied up to five (5) objects.

ME26B - AFV’s, Military Vehicles and Equipment - Small - Modified
Armoured fighting vehicles, military vehicles and equipment 1/72 scale and smaller.
Additions or modification which have changed the original kit, such as aftermarket or scratch built additions (eg: etched brass or resin interior sets). Any modifications which change the mark or version of the vehicle from the original kit representation.

AUTOMOTIVE VEHICLES
The following categories pertain to Motorcycles, Cars, Trucks and Commercial Vehicles.

ME31 - Motorcycles Non - Military
Not limited by scale.
An OPEN category and not subject to Out of Box or Modified rules.

ME32 - Cars Large
Cars 1/19 scale and larger.
An OPEN category and not subject to Out of Box or Modified rules.

ME33A - Cars Medium - Out of Box
Cars 1/20 to 1/31 scale.
The original kit may be enhanced in the following ways:
Antennas or aerials.
Interior flocking or carpet.
Seat belts.
Change of paint scheme and/or decals.
Refining of kit parts without changing their basic shape.
Drilling out of exhausts.
Panel lines may be re-scribed after construction or to correct inaccuracies.
Steering wheels maybe turned.
No additions or modifications may be made to the original kit body shape.

ME33B - Cars Medium - Modified
Cars 1/20 to 1/31 scale.
Additions or modification which have changed the original kit, such as aftermarket and scratch built additions or enhancements (eg engine sets, wiring, aftermarket interior). Vehicle body shell or shape has been changed from that presented in the original kit.

ME36 - Cars - Kerbside
Not limited by scale.
Without an engine or interior detail.
An OPEN category and not subject to Out of Box or Modified rules.

ME37 - Cars - Small
Cars 1/32 scale and smaller.
An OPEN category and not subject to Out of Box or Modified rules.
### Model Expo Groups, Classifications and Categories explained

**ME38 - Trucks and Commercial Vehicles over 3 Tonne**

Not limited by scale.

An **OPEN** category and not subject to Out of Box or Modified rules.

**ME39 – Trucks and Commercial Vehicles under 3 Tonne**

Not limited by scale.

An **OPEN** category and not subject to Out of Box or Modified rules.

---

**VIGNETTES & DIORAMAS**

The following categories pertain to models on a scenic base, which do not fit into any of the single model categories. They may or may not contain figures. The concept of these categories is to **tell a story** through the use of models.

**ME41 - Vignettes**

Not limited by scale.

A **cameo of a story**, featuring 2 to 6 figures on a small base with **simple** scenic effects.

An **OPEN** category and not subject to Out of Box or Modified rules.

**ME42 - Single Model Military Dioramas**

Not limited by scale.

A single model Diorama can contain 1 (one) model of any type on a base with **simple** scenic effects and 1 to 6 figures, which **tells a story**.

An **OPEN** category and not subject to Out of Box or Modified rules.

**ME43 - Military Dioramas**

Not limited by scale.

A scenic setting with two or more models, which **tells a story**.

An **OPEN** category and not subject to Out of Box or Modified rules.

**ME44 - Non Military Dioramas**

Not limited by scale.

A scenic display of models, of a civil, science fiction, or general non-military theme, which **tells a story**.

An **OPEN** category and not subject to Out of Box or Modified rules.

---

**FIGURES**

**ME51 - Historical Figures - Large**

Figures 76mm (1/19 scale) and larger.

Full figures of a non fantasy/movie/sci-fi nature.

An **OPEN** category and not subject to Out of Box or Modified rules.

**ME52 - Historical Figures - Small**

Figures 75mm (1/20 scale) and smaller.

Full figures of a non fantasy/movie/sci-fi nature.

An **OPEN** category and not subject to Out of Box or Modified rules.

Model Expo Groups, Classifications and Categories explained

**SHIPS**

The following categories pertain to Ships including Submarines.

**ME71 – Ships Sailing**

Not limited by scale.

May be made from non plastic materials (eg wood).

An OPEN category and not subject to Out of Box or Modified rules.

**ME72 – Ships Powered – Large**

Ships 1/500 scale and larger.

An OPEN category and not subject to Out of Box or Modified rules.

**ME73 – Ships Powered – Small**

Ships 1/501 scale and smaller.

An OPEN category and not subject to Out of Box or Modified rules.

**ME74 – Submarines**

Not limited by scale.

An OPEN category and not subject to Out of Box or Modified rules.

**MISCELLANEOUS & SCRATCHBUILT**

**ME81 – Miscellaneous**

Not limited by scale.

Any subject not covered by any other category.

An OPEN category and not subject to Out of Box or Modified rules.

**ME82 – Scratchbuilt**

Not limited by scale.

A non commercially available model, which has been built by the modeller from any materials. A scratch built item may contain commercially available parts.

An OPEN category and not subject to Out of Box or Modified rules.

**ME83 – Wargaming Armies**

Not limited by scale.

Must contain a minimum of 10 figures/vehicles to be eligible.

An OPEN category and not subject to Out of Box or Modified rules.

**ME84 – Imagineering**

Not limited by scale.

A subject created using one’s own imagination and engineering. May be made from any materials.

An OPEN category and not subject to Out of Box or Modified rules.
The following contains the descriptions for the Intermediate and Junior class categories. Please read the details under the ‘Competition Groups’ heading to see what constitutes an Intermediate or Junior model.

**INTERMEDIATE**

Not limited by scale.

An **OPEN** category and not subject to Out of Box or Modified rules.

The following Categories are provided for intermediate modellers:

- **MEIA** – Aircraft.
- **MEIC** – Cars, Trucks and Motorcycles.
- **MEID** – Dioramas and Vignettes.
- **MEIE** – Military AFVS, Vehicles and Equipment.
- **MEIF** – Figures.
- **MEIG** – Science Fiction, Movie and Fantasy.
- **MEIM** – Miscellaneous.

**JUNIOR**

Not limited by scale.

An **OPEN** category and not subject to Out of Box or Modified rules.

The following categories are provided for Junior modellers:

- **MEJA** – Aircraft.
- **MEJC** – Cars, Trucks and Motorcycles.
- **MEJE** – Military AFVS, Vehicles and Equipment.
- **MEJM** – Miscellaneous.
Model Expo competition - conditions of entry

1. Models must be presented at the entry desk between 6.00pm to 9.00pm on the Friday preceding the Model Expo weekend, and 9.00am to 12:00 noon on the Saturday.

Competition Entry Forms are available at the registration desk or can be downloaded or printed from the Model Expo website at www.modelexpo.com.au

NOTE

Models entered into the competition are not be removed before 5.00pm and the last day of the competition, without the prior approval from the Model Expo committee. Any model removed without prior approval will be disqualified and forfeit any awards.

2. The model entry fee for Adults is $5.00 for the first model and $3.00 for every additional model. The entry fee for Juniors and Intermediates is $3.00 per model. There is no limit to the number of models that may be entered.

3. JUNIOR entrants must be under 14 and INTERMEDIATE entrants must be under 18 as at 1st June in the year of the competition.

4. All models must be the handiwork of the entrant only. Each model is eligible for entry into one category ONLY. Scratchbuilt models must be entered into the SCRATCHBUILT category (ME82). The Model Expo Director reserves the right to combine categories at any time. Models will be automatically eligible for any SPECIAL AWARDS that may be applicable.

5. Models which are part of a club display cannot be entered into the competition.

6. Any model which has won an award or has placed in any category at a previous AUSTRALIAN MODEL EXPO is not eligible for entry into the competition.

7. Every entry MUST be accompanied by the instruction sheet supplied in the kit, as a minimum. Details of changes or modifications MUST be provided in writing and supported by photocopied reference material where possible. Failure to supply any of the above may incur a loss of points.

8. Except as noted, models should be substantially composed of plastic materials (which includes resin) FIGURES, SCIENCE FICTION, MOVIES and FANTASY and SCRATCHBUILT models may be composed of other materials. Non plastic figures and scenery may be used in VIGNETTES and DIORAMAS. Wooden SAILING SHIPS may also be entered.

9. Models may be displayed on a base or plinth containing additional material but the judges will consider only the specific model designated on the entry form.

10. All items within the base of a VIGNETTE or DIORAMA will be judged as a whole.

11. Any entrant has the right to bring to the attention of the Chief Judge any infringement of the Conditions of Entry, providing such notice is given prior to judging. In the event of a dispute regarding the interpretation or application of the Conditions of Entry, the decision of the Chief Judge appointed by the 'The Australian Model Expo' Director shall be final and binding. Correspondence after the event on Conditions of Entry infringements will not be entered into.

13. While the organisers undertake to provide all reasonable care and protection of models entered into the competition, such models are entered at the owner's own risk and the organisers accept no responsibility for any loss or damage that may occur.

NOTE

The Australian Model Expo Handbook is a general guide to the competition, its categories and the conditions of entry. From time to time the Model Expo committee will make changes, to ensure that the Handbook remains accurate and reflect the current modelling trends. For the latest up-to-date information always refer to the current year's Model Expo flyer, available from most good hobby shops and the Model Expo website at www.modelexpo.com.au
Model Expo competition Special awards

Special Awards

BEST OF BRAND trophies will be awarded. The eligible brands are subject to trade confirmation prior to the event.

BEST OF trophies will be awarded for the following:

BEST AUSTRALIAN MILITARY (Aircraft),
BEST AUSTRALIAN CIVIL (Aircraft),
BEST RAAF (Aircraft),
BEST AXIS (Aircraft),
BEST VIETNAM ERA SUBJECT,
BEST PAINT,
WOW AWARD,
AUTOMOTIVE MODELLING EXCELLENCE AWARD,
MODELLING EXCELLENCE AWARD,
INTERMEDIATE ENCOURAGEMENT AWARD,
JUNIOR ENCOURAGEMENT AWARD and
PEOPLES' CHOICE.

Winners of the following awards will also have their names added to the perpetual trophies, which will remain in the keeping of ‘The Australian Model Expo’ committee.

BEST OF SHOW - SENIOR,
BEST IN SHOW - INTERMEDIATE and
JUNIOR MODEL OF MERIT.

Best Display

Every club and individual that displays at Model Expo is eligible for the ‘Best Display’ award, which will be decided upon by a public vote in the same manner as the ‘People’s Choice’ award.

The club or individual display that receives the most votes from the public, will be declared the ‘Best Display’ and the club that receives the most votes will be declared the ‘Best Club Display’. Therefore, a club can potentially win both awards.
WHO IS ELIGIBLE TO ENTER?
Anybody who builds models can enter. You do not need to be a member of any modelling club.

WHAT MODELS CAN BE ENTERED?
You can enter any model that you have built from a plastic kit, provided that it complies with the competition rules printed in the handbook. There will be a category for your model whatever it may be. There are also categories for models that may be built from materials other than plastic; refer to Conditions of Entry, Rule No 8.

ARE THERE CLASSES AND CATEGORIES FOR THE LESS EXPERIENCED AND JUNIOR MODELLER?
The OUT-OF-BOX (OOB) categories are intended to encourage the greatest possible participation from the less experienced modeller. OUT-OF-BOX category models will therefore not have to compete with the super detailed models entered in the MODIFIED (MOD) or OPEN categories, but you can still tweak the model a bit such as adding seat belts.
There are JUNIOR and INTERMEDIATE categories as well. If you are under 13 or under 18 on the 1st June in the year of the competition, then you are eligible to enter any of the Junior or Intermediate categories listed in the handbook.

HOW DO I ENTER?
Simply bring your models to the Sandown Entertainment Centre, Sandown Racecourse, Princes Highway, Springvale at the following times: between 5.00pm to 9.00pm on the Friday preceding the Model Expo weekend, and between 9.00am to 12:00 noon on the Saturday.

ARE THERE ANY TROPHIES?
Category winners and place getters receive a trophy in all divisions.
Commended Certificates and Encouragement Awards are also given. Special awards are also given. Winners will be announced and awards presented late afternoon on Monday.

IS THERE A SWAP & SELL AREA?
A Swap & Sell is held on the Monday morning from 10.00am until 12noon. It is for private sellers only and no retailers are allowed. The Swap & Sell is held in a separate area and an admission fee is charged. The fee does not include admission into the Model Expo display area, which has its own admission charge. See the Model Expo flyer or this website for full details.

THESE MODELS ARE ALL SO GOOD — HOW CAN THE JUDGES PICK A WINNER?
Many models look good sitting on the competition tables but the close scrutiny of the judges often reveals flaws in basic construction, that aren't readily apparent to the casual viewer. In a category with a small number of entries, it's not unusual for the judges to finish their first 'eyeball' appraisal and discover that everything in the category has one or more problems. That's when the judging really gets hard! The mistakes are usually basic and relatively minor; seam problems on one model, silvered decals on another, misalignment on a third, etc. It's easier if one of the models has something that distinguishes it from the others. Some extra work that's been done well, a particularly nice finish, etc, but if all the models are built to approximately the same standard, the judges end up having to determine the winners based on which models have the fewest mistakes.

CAN I ASK A JUDGE ABOUT MY MODEL?
After judging is finalised, most judges are happy to discuss the good or bad aspects of a model with the entrant. However it's not a good idea to corner a judge demanding to know why your model didn't win. Judges are experienced modellers but they are only human and will react to unreasonable demands in a human way, resulting in no useful exchange of information. These judges have most likely spent a good portion of the previous night judging into the early hours of the morning, so they need their private space to recuperate before answering questions. Don’t monopolise their time as there may also be other entrants waiting to ask them questions. All you have to do is ask, but do so in the same way you would want to be asked if you were in the judge’s shoes. A good way to improve your modelling skills is to join a club, or volunteer to do some judging. Working together with an experienced judge will teach you more about judging and model building than you could learn in a whole month of Sundays. Remember the old saying, the judge’s decision is final, and it’s true, so don’t expect results to change just because you don’t like the outcome. Be positive, listen to
the judge’s critique and be determined to win by acting on that advice given to improve your modelling skills.

CAN ANYBODY JUDGE?
Model Expo has a set of guidelines for judging that all judges follow. We encourage modellers to judge outside their specific area of interest. In fact in many ways we prefer judges who have an interest, but may be do not build a subject, to judge the models. They follow the guidelines closer and tend not to use any prior or own knowledge when judging. Model Expo now has a core of about 30 to 40 judges that come each year and have at least 3 years experience. We rely on that more than specialising.

WHAT QUALIFICATIONS DOES A JUDGE NEED?
Model Expo encourages the judging experience and training is done at Model Expo. The first year a person judges will see them paired up with a highly experienced judge. The second year may see them paired with a person who may have only 2 years experience. The Chief Judge always takes a keen interest in the Model Expo judging teams and maintains close vigilance on them to ensure that any problems or difficulties are quickly resolved.

WHAT IS THE DIFFERENCE BETWEEN AN NNL STYLE EVENT AND A FULLY JUDGED CONTEST?
Basically, at an NNL (National Nameless Luminaries) event the winners are chosen subjectively (by eye) by the public and/or modelling peers. At a judged contest the winners are chosen after technical inspection of each model entered. Each method involves judgement decisions and each has merits and faults, so it really only depends on the entrant and whether or not he wants his model to be primarily “judged” by the viewing public, or by protracted inspection by modelling experts. This also raises an old argument as to whether only experts can judge the quality of cultural output, or whether the taste of the public also has merit. However it is generally felt that in certain situations, experts are better judges because of their impassionate approach to the task and the anonymity of the entrant. Model Expo competitions are judged by experts in specific subjects to strict guidelines, as detailed in this handbook.

Alterations and additions:

080510 All categories updated and revised. Enhanced class removed from categories.

090111 All categories updated and revised. Axis and Allied added to Aircraft and Military Vehicle categories.

070112 Front cover page updated. Page 2 updated. Table of contents revised (Page 3). General information revised and updated. Revised judging score sheet added (Figure 2). Category ME17 Aircraft Vacuform deleted. Categories ME14A3, ME21A, ME 21B, and duplicate ME35 renumbered to ME14B, ME21A1, ME 21A2, and ME37. Category ME51 Figures Large changed from 65mm and larger to 76mm and larger. Category ME52 Figures Small changed from 65mm and smaller to 75mm and smaller. Scale equivalents added to Figure categories. Special Awards updated (Page 21).

310316 Page 10 updated, new Score Sheet. Category ME61 split into ME61A Out of Box and ME61B Modified.

MODEL EXPO SWAP & SELL

Last day of Model Expo 10.00am to 12.00 noon
Model kits, books, magazines, modelling accessories,
diecast, DVD’s, decals, spare parts, bargains galore
Note: Swap & Sell is a separate event to Model Expo and has a separate entry fee.
